

Global eDiscovery

Epiq: Local Convenience, Global Reach

As a global leader in providing best-quality legal technology products and services for electronic discovery and document review, we tailor our approach to your unique needs—no matter the location, size or complexity of your project.

Epiq offers project-by-project services, managed services and enterprise-level solutions. We help you achieve your objectives with local expertise backed by a global network, so you get the specialized support you need, wherever you need it.

We can recommend and implement the most effective eDiscovery strategies while maintaining the highest global and local security and confidentiality standards. Our project managers coordinate with our global teams to provide seamless, reliable, around-the-clock client support.

eDiscovery Services

Epiq offers a breadth of eDiscovery solutions, including data collection, forensic analysis, processing, hosting, document prioritization and production. We offer clients a single point of accountability for all eDiscovery needs.

Data Collection: Epiq is uniquely equipped to handle worldwide projects—we have experts around the world, the ability to deploy teams on-site globally and the experience to navigate through country-specific data protection laws.

Processing: We provide global processing using industry-leading tools such as DMX™ (DocuMatrix®) and HorizonSM, a processing workflow that seamlessly integrates leading processing applications such as Nuix and kCura's Relativity®.

Hosting: Epiq offers both DMX and Relativity, two of the leading processing and document review platforms on the market.

Document Prioritization: Epiq's document prioritization services and software, proprietary hosting and predictive coding solutions are available globally and can be deployed on-site.

Production: We offer high-volume capacity and a wide range of subject-matter expertise.

Managed Services

Managed services offers a holistic, enterprise-wide approach to eDiscovery. It eliminates the need to shoulder the upfront costs of purchasing hardware and software. Epiq provides every capability needed to reliably perform eDiscovery—software, hardware and processes—but most importantly, we provide the workflow management to make these capabilities work together. Epiq works with you to design a managed services package to suit your capacity and workflow requirements at a fixed monthly cost.

Data Centers and Security

Epiq maintains a multi-layered security program: we utilize leading commercial technology to provide defense against both external and internal attacks. Epiq maintains a full-time staff of certified information security professionals to manage our security program. Regular audits and risk assessments are combined with an advanced intelligence network to assess potential security risks and Epiq's ability to meet emerging threats. We operate SSAE 16 and ISO 27001 certified data centers around the world, all with hardened exteriors sitting on dual power grids, employing generator backup and 24/7/365 closed circuit and manned monitoring. Epiq employs the latest backup methodologies with a variety of disaster recovery options to meet a wide range of data recovery requirements.

Professional Services

Our global consulting team offers expert services in discovery preparedness, litigation and practice support, litigation and dispute services, records management, early case assessment (ECA) and information governance. We also have expert services available in law department strategy and technology planning and implementation.

Epiq On-Site Solutions

On-site solutions ensure compliance with data and privacy regulations and corporate cyber-security protocols. Epiq's suite of on-site solutions coupled with our document review services allow you to conduct investigations wherever and whenever the need arises.

We Provide:

- Scalable on-site solutions delivered rapidly, anywhere in the world
- Complete foreign language support, capable of ingesting more than 195 languages, providing searchable text and metadata
- The ability to support multiple reviews and geographically dispersed reviewers
- The capability to host millions of documents
- Loading and integration of documents from third-party processing tools
- Consultants and experts on-site
- Integrated workflow
